WORK EXPERIENCE

Network Lab Assistant

2020 – 2023

NJIT

- Configured Layer-2 switches, routers, and assisted in maintaining lab network infrastructure.
- Built T-568B cables and pushdown boards; supported hands-on networking exercises for students.

Front of House / Cashier

2020 – 2023

Marty's Burgers

- Handled high-volume customer transactions and provided first-line support.
- Trained 7 new employees in POS usage, communication, and workflow efficiency.

PROJECTS

AI-Powered Job Application Assistance Platform - [Link](#) | *React, TypeScript, Python, FastAPI, SQLAlchemy, SQLite*

July 2026

- Developed a full-stack SaaS application utilizing AI algorithms to analyze job descriptions and dynamically synthesize customized resumes and cover letters.
- Architected a unified relational database schema and central management system to securely persist user profiles, historical submissions, and application artifacts.
- Implemented modular data persistence pipelines to handle real-time frontend state management, historical data visualization, and application tracking metrics.

System Integration Project - [Link](#) | *Linux, Apache, PHP, MySQL, RabbitMQ, Bash*

- Developed a multi-VM distributed system (webserver, API, worker) using Linux, Apache, PHP, MySQL, and RabbitMQ.
- Automated background worker scripts using systemd and Bash for reliable message consumption.
- Managed Linux services, firewall rules, permissions, logging, and VM networking.
- Collaborated through Git, issue tracking, and Linux-based development workflows.

Machine Learning Projects | *Python, NumPy*

- Implemented logistic regression and perceptron models from scratch using NumPy.
- Visualized decision regions and analyzed convergence behavior across parameters.
- Compared accuracy and performance across multiple datasets.

SADAL Language Parser (Compiler Project) | *C++*

- Built a lexical analyzer and recursive-descent parser in C++ for a custom language.
- Implemented tokenization, grammar validation, and structured error handling.
- Debugged pointer logic, memory behavior, and multi-file integration during development.

EDUCATION

New Jersey Institute of Technology

Newark NJ

B.S. in Computer Science | Minor in Information Technology

2023 – 2026

SKILLS

Languages : Java, C++, C, Python

Scripting : PHP, JavaScript, Bash/Shell, TypeScript

Databases & Dev Tools: MySQL, SQLite, SQLAlchemy, Git, RabbitMQ, Apache

OS : Windows, Linux (Ubuntu), macOS, Kali Linux

Frameworks : React, FastAPI, NumPy

Tools : Network Configuration, Cisco IOS, MS Office, Google Workspace

Security & Testing : Cryptography (AES/RSA), Application Security (OWASP Top 10/SQLi/XSS), Firewalls
